

COURIER MANAGEMENT SYSTEM(CMS)

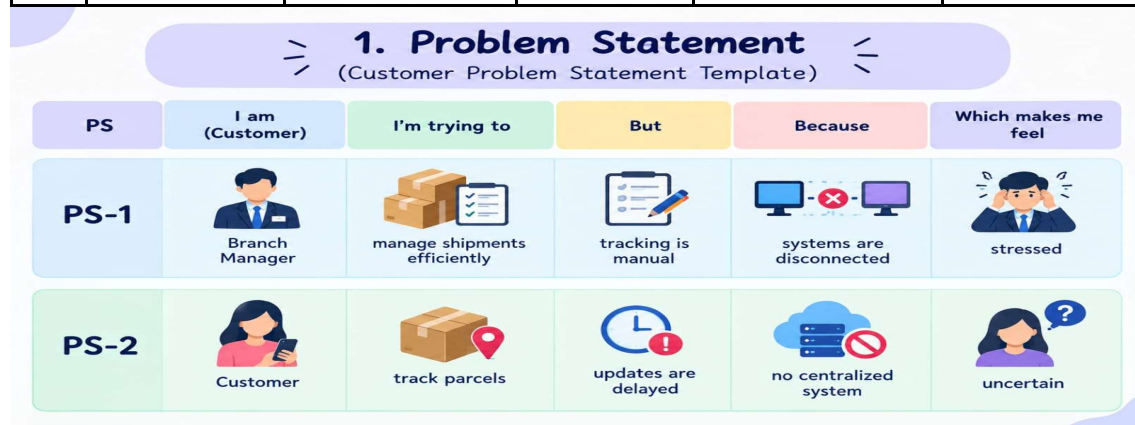

1. BRAINSTORMING & IDEATION

1.1 Problem Identification

The Courier Management System identifies several problems in traditional courier and delivery operations. Manual shipment booking and record management can lead to errors and increased workload. Customers may face difficulties in tracking their parcels and receiving timely delivery updates. Manual delivery agent assignment can cause scheduling conflicts and delays. The lack of automatic notifications makes customer communication difficult, while manual invoice management may result in billing errors. Managing multiple branches and monitoring delivery performance can also be challenging without a centralized system. These problems can reduce operational efficiency, increase delays, and affect customer satisfaction.

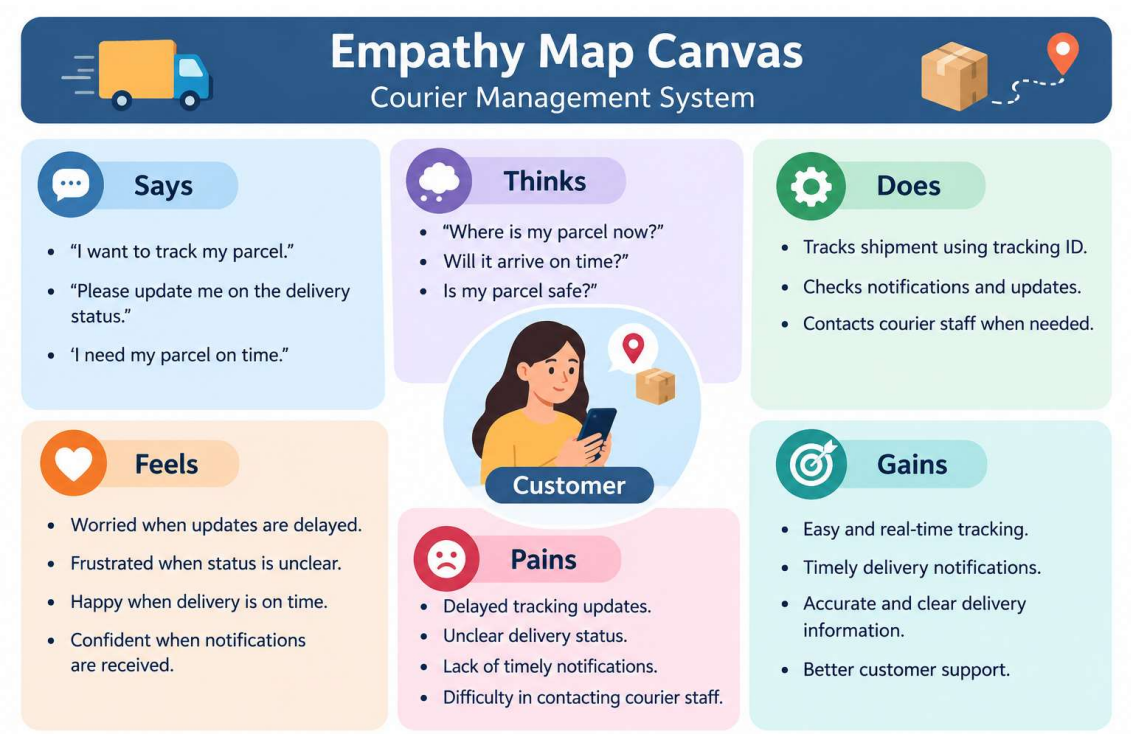

1.2 Problem Statement

PS	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	Branch Manager	manage shipments efficiently	tracking is manual	systems are disconnected	stressed
PS-2	Customer	track parcels	updates are delayed	no centralized system	uncertain

1.3 Empathy Map

Section	Customer
Says	"I want to track my parcel."
Thinks	"Where is my parcel now?"
Does	Tracks shipment and checks notifications.
Feels	Worried when updates are delayed; happy when delivery on time
Pains	Delayed updates, unclear status, lack of notifications.
Gains	Easy tracking, timely notifications, and accurate delivery information.

1.3 Brainstorming & Idea Prioritization

Ideas Considered

During brainstorming, several ideas were considered to improve courier and delivery operations:

- Online courier booking system
- Real-time shipment tracking
- Delivery agent management
- Automatic customer notifications
- Branch management
- Delivery performance reports
- Customer management
- Digital delivery confirmation

Final Selection

- Centralized courier and shipment management.
- Easy shipment booking and tracking.
- Real-time delivery status updates.
- Delivery agent assignment and management.
- Automatic customer notifications.
- Customer and branch information management.
- Delivery confirmation and status recording.
